

Quiz #6: Monday, Oct 24

Name: _____

Recitation R02 (M)

Find the derivative of each function below. Simplify your answers.

1. $f(x) = (x + 2)^5$

2. $g(t) = 3e^{2t} + 4$

Quiz #6: Monday, Oct 24

Name: _____

Recitation R02 (M)

Find the derivative of each function below. Simplify your answers.

1. $f(x) = 4e^x + 3 \ln x$

2. $g(r) = (r^3 - 2)^7$

Quiz #6: Tuesday, Oct 25

Name: _____

Recitation R04 (Tu)

Find the derivative of each function below. Simplify your answers.

1. $f(x) = (x^2 + 3x)^6$

2. $g(s) = 4e^{3s} - 6$

Quiz #6: Tuesday, Oct 25

Name: _____

Recitation R04 (Tu)

Find the derivative of each function below. Simplify your answers.

1. $f(x) = 2e^x - 4 \ln x$

2. $g(z) = (z^2 - 5z)^4$

Quiz #6: Wednesday, Oct 26

Name: _____

Recitation R03 (W)

Find the derivative of each function below. Simplify your answers.

1. $f(x) = (x - 4)^6$

2. $g(u) = 5e^{2u} + 3$

Quiz #6: Wednesday, Oct 26

Name: _____

Recitation R03 (W)

Find the derivative of each function below. Simplify your answers.

1. $f(x) = 4e^x + 5 \ln x$

2. $g(p) = (p^3 - 4)^7$
